SAR-LAR

TECHNICAL SHEET

Automatic rotary machine for blowing or washing glass or PET bottles inside, provided with star-wheels and cochlea, stainless steel AISI 304 conveyor belt, and safety guards on access doors.

Stainless steel frame mounted on adjustable feet for easy positioning. Visible parts in stainless steel AISI 304. Blowing or washing system by turning upside down the bottle. PALL filtration group (final filtration 0.2 μ). Fixed nozzle and simple treatment. Valve with no bottle-no spray. Manual height adjustment for the blowing group. Electronic speed control by an inverter. Security device on the star-wheels and on the cochlea to stop the machine in case of failure to prevent breakage of bottles. Photocell for automatic start positioned at the entrance of the machine, no bottles - no start. Photocell, positioned at the exit, in case of overflow, stops the machine. Automatic restart. Stainless steel electric board.
